

DESIGN, ENGINEERING AND CONTRACTING FOR THE COMPUTER INDUSTRY

If You're Interested in Improving the Reliability of Your Data Center Facility Operations, and You Want to Integrate and Deploy "Best Practices" and the "Optimum" Data Center "Hybrid" SolutionsThere is Only One Place to be!!!!

AFCOM Data Center World National Harbor 2015

Mark Evanko at Gaylord National Resort & Convention Center presenting:

"Data Center Internal Facility, Cloud, Co-location, and Container Working Together"

Session: #ITM 4.1...Monday, September 21, 2015 @ 10:20AM

Visit BRUNS-PAK at Booth #106 on the Show Floor

Mark Evanko, a principal of BRUNS-PAK who has more than thirty-six (36) years of experience designing and building mission critical data centers, colo/cloud facilities, and disaster recovery sites, will deliver this brand new presentation. Here's what your **peers have said** about his *previous* presentations:

"I thought my data center was extremely reliable until I heard this session. (The speaker) made me rethink our status. Excellent presentation."

...

"The best facilities presentation I've ever seen." "Great delivery – great look into the future."

...

"Excellent knowledge and presentation skills Best session so far." ... "Evanko is awesome! Tons of info. Makes it interesting!"

...

"Best session I have attended. Good examples of how to solve real-life problems." "Excellent content-great presenter!"

...

"...a very informative and energetic speaker...(who) deals with 'real world' situations unlike some speakers who tend to speak about topics in a 'dream world.' This session was most informative out of all the sessions I attended."

...

"As always this session and its presentation top the list!" "Best seminar of the conference – hands down."

A must-see presentation for anyone:

- ✓ *Reviewing CAPEX vs. OPEX "Hybrid" options...Renovate/New/Colo/Cloud/Container-POD/Network/WiFi*
- ✓ *In the planning stages of a Data Center/Colo/Cloud/NOC facility*
- ✓ *Embarking on a facility retrofit, renovation, or expansion*
- ✓ *Relocating a facility*
- ✓ *Consolidating data center operations*
- ✓ *Designing/building a new facility*
